GETTING STARTED WITH DATA ANALYSIS TRACKING

The system currently supports the following tests:

- Australian Criterion Scale Writing
- VCOP
- BURT Reading
- NAPLAN
- South Australian Spelling Test
- Probe
- PM Benchmarking
- VCAA
- PAT Reading Comprehension
- TORCH
- Schonell Spelling Test
- M100W
- Letter Identification
- PAT Maths
- Fountas & Pinnell

You can:

- Use standard tests or school-based assessment tools.
- Create and manage which tests teachers mark students against.
- Input raw scores and convert them to adjusted scores.
- Import NAPLAN data.
- Produce graphs to analyse student progress over a selected date range.
- View individual or class progression.
- Set parameters to determine groups based on test performance.
- Produce a range of outputs; graphs, lists, sorts & exports.
- Sort and group students based on test performance.
- Sort students based on growth.

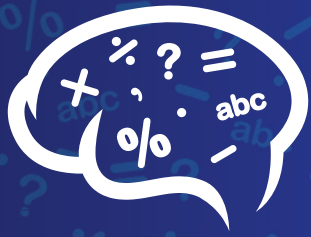

- Export files as CSV, Excel or PDF files.
- Output multiple test data on a single axis if the base scale is the same.
- Output multiple tests for a student on the same page.
- Track growth & adjusted growth.

REPORTS AND DATA ANALYSIS TRACKING WITH uEducateUs

uEducateUs is the leading School Management system when it comes to Reporting and Data Analysis Tracking. We have completed extensive research with Principals, Business Managers and Teachers to develop the best Reporting and Data Tracking modules to date.

Reporting

uEducateUs reporting allows:

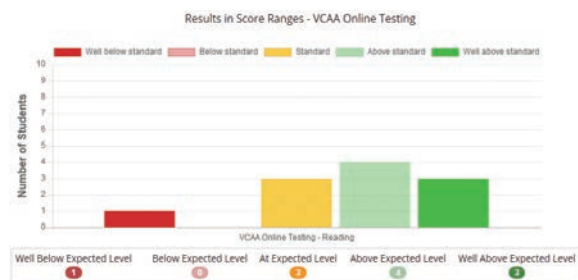

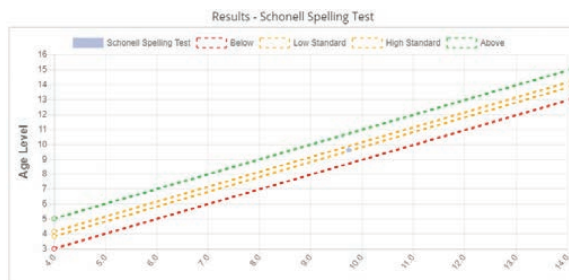

- Teachers to create Progress and Semester Reports effortlessly.
- Generated reports to be printed and handed out, emailed or sent to parents to be viewed on their chosen device.

Data Analysis Tracking

The uEducateUs Data Analysis module allows:

- Schools to create and manage student tests and data input.
- Teachers to analyse how students have progressed over selected ranges.
- Identification and grouping of students based on their performance.
- Raw score input to be converted to adjusted scores.
- A range of outputs, including graphs, lists, sorts & exports.
- Multiple data outputs to be displayed on a single axis (where the base scales are the same).
- Multiple test results for a student to be displayed on a single page.
- The tracking of growth, including the adjusted growth.
