

uEducateUs

Keeping your school management ahead of the curve

We were looking for a program that would suit a smaller school both in terms of costs and functionality. We were so excited to find uEducateUs after hearing about it through a web forum. uEducateUs has allowed us to store everything in one place from wellbeing and reporting, to family details and attendance. Our parent community has also really engaged with uEducateUs and are beginning to log on absences and late/early arrivals/departures. The kiosk function is a favourite amongst our families. The list of features this program allows us to do seamlessly is far too big to summarise into one testimonial.
