

Issue 2

July 2022

School Management System

Designed to make administrating schools and classrooms easier and is comprehensive and affordable. Track student attendance, activities and improve communication between staff, teachers, students and parents.

Attendance Preset

Administrators now have access to an 'attendance preset' feature within the attendance module. This feature allows for a student's attendance to be preset to generate with a specific attendance code and comment for any future or unmarked attendance roll.

Primarily designed to cater for part-time students, it can be utilised for any weekly recurring situation.

Attendance Preset

	Name: Krille BALDESION Gender: Female DOB: 23-05-2011 Home Group: 04 Campus: Demo Kiosk Primary School						
Start Date 03-06-2022	End Date 01-07-2022	<input type="button" value="Save"/>	<input type="button" value="+ Add Attendance Preset"/>

Release 1.30

uEducateUs 1.30 was officially released on the 30th of June 2022.

The key new features in this release:

- **CR-2767 Attendance Preset**
Attendance can now be preset so the roll can be prefilled with an attendance code and comment of your choice.
- **CR-2739 Semester Reporting - Absence table**
Absent table options have been made available for semester reports. As per June Newsletter.
- **CR-2667 Username generation - Blacklist**
Undesirable usernames can no longer be created.

A full list of release notes can be obtained in uEducateUs or the following link: [Release 1.30](#)

uEducateUs Mobile (Android)

The newly developed uEducateUs Mobile application for Android devices has entered the final phase of testing.

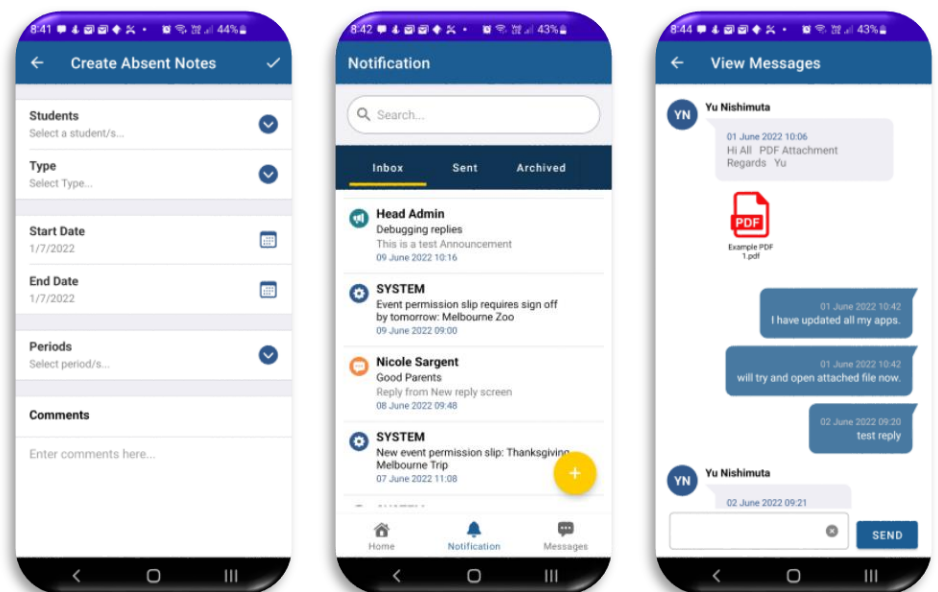

This app has been built from the ground up to solve many of the shortfalls experienced when communicating to parents. The initial release will support the following modules:

- Communication
 - Announcements
 - Conversations
 - Newsletters
- Attendance
 - Absent Notes
 - Unexplained Absences
- Permission slip approval
- Updated push notification support
- Native download support

Additional modules will be added upon each update.

The new App has come about due to existing push notifications not being supported in Android 10 along restrictions to native download (attachment) support.

Hats off to our mobile developer MJ and the entire team.

Reading Module

Teachers can say goodbye to reading folders.

Did you know uEducateUs comes with a built in Reading Module to keep track of all the books that students have read or are currently reading?

Those schools that currently utilise this find it easy, so those of you who have not ventured down this path, why not explore your options? Parents love it, they can add books and tick them off when the student has read it.

Teachers can see where the student is at with their reading and can easily monitor and assist those that require more support.

** Check out this Facebook page which highlights lots of exciting children's books.

Data Analysis

Thank you to the schools that got back to us regarding our Data Analysis questions. We are still accepting responses this month as well so there is time if you still want to participate.

Q. Questions

What would your school like to see in Data Analysis?

How would you like to view students' scores aggregated?

What type of graphs would you prefer to see?
