

uEducateUs

A full-featured school management system that simplifies and streamlines processes.

You and your staff can get on with the job.

Don't jump between systems, expensive add ons, or do without something because you either can't afford it, or the system your using doesn't supply it.

Tyers Primary School uses Google Drive and **uEducateUs** Tasks to issue schoolwork to students. Teachers can choose from Learning Tasks, Homework, Assignments Assessments and Quizzes.

A due date is assigned, a link to the Google drive is pasted in the task. The task is sent to parents who can supervise their children, attach the work and send it for marking.

Due dates are recorded in the parent's **uEducateUs** Diary so they'll know when work is due.

CASE STUDY

Learning from home Tyers Primary School

Tyers Primary School in Gippsland, Australia adopted **uEducateUs** software early. They have a mixed approach to remote learning using both **uEducateUs** and Google Education.

- **uEducateUs** tasks are used to notify parents of assigned work held on other platforms. Due dates can be set for work to be submitted. Parents can follow the work their children have completed.
- Teachers utilise additional third party applications to create educational material, including class information, downloads and links to reference material available.

This method is self-directed, but can be monitored by parents. A student starts working via Google Education, completing course work as required by the teacher.

*Working together is great!
User Groups can be used as an online space for specific students, parents and teachers to discuss work.*

Tyers Primary School is in Gippsland, was established in 1879 and has just over 100 students.

SOLUTION SUMMARY

The Covid-19 pandemic continues to affect the population worldwide.

Victorian schools returned to remote learning, vastly different to classroom learning.

Tyers Primary School took advantage of specific built-in **uEducateUs** features.

Teachers created announcements to explain schoolwork and sent them directly to parent accounts.

Parents logged into **uEducateUs** to access schoolwork provided for their children.

Teachers found **uEducateUs** simple to navigate, despite their initial apprehension.

uEducateUs have made improvements to help schools.

- Quizzes are easier to set up [Learn More](#)
- Students and Parents can be sent reminders if assigned tasks have not been opened: [Learn More](#)
- Tests workflow has been improved.

uEducateUs Conversations enable Teachers to check-in with individual students a group of students or parents via their smartphones.

Similar to chat messaging, how easy is that? Parents and students can also check in with teachers and ask questions.
